

## MedPhab Community marketplace publication guidelines

The Community management platform is a digital platform that showcases a comprehensive catalogue of organizations and prototypes/products/services in the field of photonics-based medical devices. This platform is available at <https://community.medphab.eu/>

### 1. Structure of the Community management platform

The main page, Figure 1, shows the different modules that are available to the visitors:

- Organization registry: catalogue of the ecosystem/community organizations
- Community marketplace: MedPhab community marketplace, showcase of the prototypes/products/services/technologies.
- Community: shared information, e.g. news, announcements on events, trainings, job opportunities, regulations, videos, which are for the benefit of the ecosystem.

**Figure 1. MedPhab CMP front page showing the three public modules: organization registry, community marketplace and community.**

In the same page there is access in the left side to the Website, and in the right side the login and registration button (marked with a red circle). Further information on how to login and register is found on section 2.

## 2. How to contribute to the CMP

Stakeholders that participate in the ecosystem of medical devices using photonic technologies, incl. component suppliers, technology providers, investors, etc can be part of MedPhab community.

### 2.1. Log in/registration

By selecting to Login and registration (Figure 2), the user must fill in the registration form (Figure 3) in case is the first time visiting the CMP. Data use policy complies with European GDPR guidelines. Users can login with their credentials after registration, passwords can be change anytime, and in case of forgotten password and email to reset password will be sent to the registered email. The community manager will revise new registrations and approve the user and organizations that comply with the following criteria:

- Belong to the value/supply chain of photonics-based medical devices
- Contribute actively to the ecosystem
- Be a Key Opinion Leader (KOL) or stakeholder in the photonics-based medical devices ecosystem

In addition, the community manager will revise that all required information is completed and in high quality in order to publish it in the organization registry module (Figure 4).

## 2.2. Adding new items

### 2.2.1. Marketplace items

After the registration form is approved, user can log in (Figure 2) and contribute to the Marketplace with a product, prototype or technical services by clicking **Add new** under the community marketplace module (Figure 5).

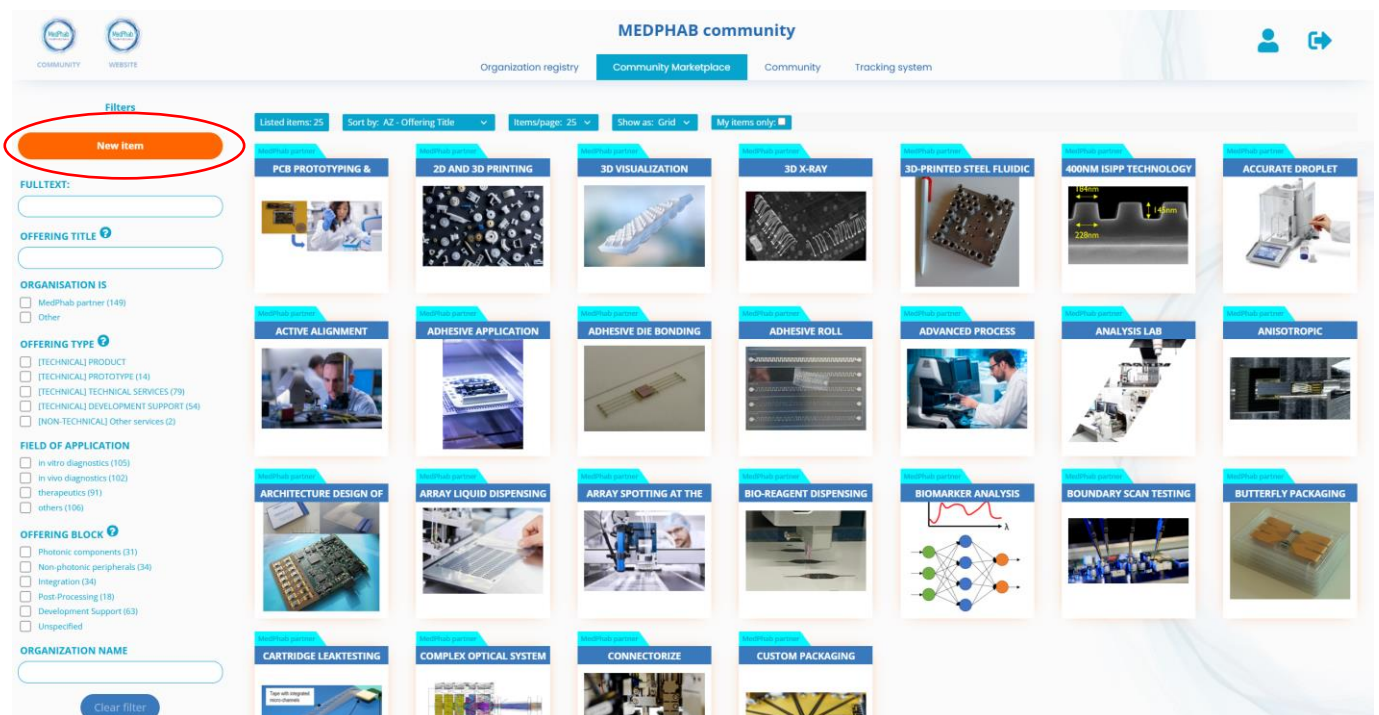

Figure 5. Current view of the first page of the community marketplace module.

In order to contribute to MedPhab Marketplace, the **registered user** fills in an online offering form (Figure 5) with detailed specifications and description of offered product/prototype or technical service, including a photo or drawing. Every new item is visible on the Marketplace as soon as it goes through the quality content check by MedPhab community manager. It usually takes 48 hours. If the content of the item does not fulfil the required criteria to be published or part of information is missing, the user is contacted individually by the community manager. It is encouraged to maintain the content of the items up to date.

**Criteria to be considered from registering items:**

- Belong to the value/supply chain of photonics-based medical devices
- Contribute actively to the ecosystem
- Be Key Opinion Leader (KOL) or stakeholders in the photonics-based medical devices ecosystem

In order to use the benefit of the MedPhab CMP, users must complete the spaces marked "compulsory" (denoted by '\*'). If they do not complete the required personal data or only partially provide them, this could mean that ABIMI (AMIRES, The Business Innovation Management Institute) is unable to deal with their requests and therefore ABIMI will be exonerated from all liability for not rendering or not fully rendering the requested services.

## 2.2.2. Community module items

The **registered user** can also share a post with events, job advertisements, report training, video or more within the whole community by clicking **New Item** under the community module (Figure 7), which will enrich the interaction of the community and networks formation.

The screenshot displays the MEDPHAB community interface. At the top, there are navigation tabs: 'Organization registry', 'Community Marketplace', 'Community' (selected), and 'Tracking system'. Below this is a horizontal menu with various categories: 'EVENTS', 'FUNDING', 'JOBS', 'REGULATIONS', 'REPORTS', 'SKILLS & TRAINING', and 'VIDEOS'. A 'New Item' button is highlighted with a red circle in the top left corner. The main content area shows a grid of community posts, each with a title, a brief description, and a date. The posts include:

- NNT 2021**: NNT 2021, the 20th International Conference on Nanosprint and Nanosprint Technologies, will be arranged on November 16th-18th.
- MEDPHAB WEBINAR**: This webinar introduces MedPhab, presents our technology capabilities and tells how to work with us.
- PHOTONICS MARKET REPORT**: Photonics21 PPP published 1 the brand new Market Data & Industry Report on Photonics.
- MEDPHAB OPEN CALL**: Open Call for the external companies developing medical products.
- MEETING ON MEDICAL DEVICES**: MedPhab will be presenting at the EPIC Online Technology Meeting on Medical Devices on 4 December 2021 at 15:00 CET.
- DIRECT ROUTE TO THE MARKET**: MedPhab will be presenting at The at Pilot Lines in Photonics Workshops: The direct route to the Market on 8 November, in Brussels, Belgium.
- COMPAMED HIGH-TECH FORUM**: MedPhab will be presenting at EPIC Online TechTech on Laser and Photonics Applications at COMPAMED HIGH-TECH FORUM by IFAW on 16 November 2021.
- MEDTECH INDUSTRY INVESTORS**: Mapping of investors in MedTech industry during the period 2018-2020.
- MDR STARTS 26 MAY 2021**: 2 new Regulations (Medical Device Regulation or MDR and in vitro Diagnostic Devices Regulation (IVDR) are replacing the 3 existing Directives.
