MedPhab

MedPhab offering
helps you navigate at your
development path

MedPhab is Europe's first Pilot Line dedicated to manufacturing, testing, validation and up-scaling of new photonics technologies for medical diagnostics enabling accelerated product launch with reduced R&D costs.

Accelerate product development through world-class RTOs and industrial partners who speak "the same language".

Be matched with the right R&D partners through a single entry point.

Get a comprehensive evaluation of technology readiness and guidance in development priorities.

MedPhab covers all project stages from prototyping to manufacturing development towards ISO13485.

Applications

Personalized
monitoring

Surgery and
therapy aid

Lab-on-chip
diagnostics

DEVELOPMENT

PRODUCTION

- 1 Fast learning
- 2 Flexible control
- 3 Industrial control
- 4 Pre-manufacturing
- 5 Manufacturing

To further increase the chance for success we have invested in shared development approach between MedPhab partners.
